WELCOME TO

Perform Like a Champion

Welcome to Dan Hollander Production Seminars. I have learned in my skating career that most successful skaters have been exposed to positive influences and are able to learn from many different people. I have also found that people always respond to comedy and laughter, which is why I not only perform that way, I also teach that way.

I have gathered together positive, knowledgeable, and exceptional people to teach at my seminars. We can help you with all aspects of skating: jumps, spins, edging, power, off ice, new judging system, to name a few. You will not only walk away with a ton of information and new goals, but you will have had a good time doing it.

My seminars provide the best value for you and your skater. Our rates not only give your skater more time with every instructor, but also more instructional time on and off the ice for your money than other seminars out there. Skating is an expensive sport! So make the most out of your budget and pick a Dan Hollander Productions Seminar!

See you at the seminar!

Dan Hollander

ADDITIONAL CLASSES AND LESSONS

Private Lessons

Private Lessons are available every day. They will be scheduled before or after the regular seminar times. Each coach has listed his or her private lesson fees for a 15min lesson. Private lessons will be booked on a first come first serve basis. The earlier we receive your registration, the better your chances are of having a time reserved for your skater. You may book ONE private lesson per coach with your registration. With each private lesson you book, a 1/2 hour freestyle session must be purchased. Each 1/2 hour session is \$6.50. If you would like to be informed when more time becomes available with a specific coach, you should check the appropriate box and you will be contacted.

New Judging System Critiques

Footwork and Spin critiques for the New Judging System will be available through private lessons with Technical Specialist, Gene Heffron. Gene will give feedback on what can be done to improve upon the execution of these elements in the new system.
